

Lewistown Road/Route 802 Bridge Replacement over I-95 *Hanover County*

Why are we doing this project?

This project will replace the existing 50 year old structure with a structure that allows for added capacity and safety improvements. The new structure will accommodate two westbound lanes and one eastbound lane. Turn lanes will be added to Lewistown Road at the I-95 interchange, truck stop and Airpark Road.

What is the location of the project?

The project includes the Lewistown Road bridge, its approaches, the relocation of Airpark Road and the relocation of the I-95 off ramp to Lewistown Road.

What traffic impacts are expected?

Drivers can expect Lewistown Road traffic to be shifted during demolition of the existing structure and construction of the new structure. There may be lane closures on Interstate 95 during demolition.

When will the project be constructed?

Construction is expected to begin in spring 2015 and end in November 2017.

How much will the project cost?

The total project cost estimate is \$30 million. This includes the estimated price for design, right of way acquisition and construction.
